

Oснаider Pertuz Navas

Software Engineer – .NET & C# / Technical Lead

Oснаiderpertuz@gmail.com | Barranquilla, Colombia
pertuznavas.github.io | linkedin.com/in/osнаider-pertuz-navas-303530235

PROFESSIONAL PROFILE

Software Engineer with 7+ years of experience building scalable systems on .NET (Framework, Standard and Core). Recent experience as Technical Lead at Ombia, leading teams and cloud-based architectures on Azure. Strong background in REST API design, microservices, system integrations and database-driven applications, with hands-on experience in cloud services (Azure App Services, Azure SQL Server, Azure API Management) and AI-assisted development tools. Known for technical leadership, clean architecture, code quality and mentoring. Currently seeking new opportunities.

WORK EXPERIENCE

Ombia — Technical Lead

February 2025 – September 2026

- Joined as .NET Developer and was promoted to Technical Lead within the first month.
- Led a backend team that evolved from 10 to 8 and later 5 developers, delivering scalable REST APIs and integration services.
- Later led an additional project with a smaller team of 2 developers.
- Designed and maintained architectures using .NET 8 and EF Core.
- Deployed and managed services on Azure App Services, databases on Azure SQL Server, and APIs exposed through Azure API Management.
- Performed code reviews, defined best practices and enforced clean architecture.
- Coordinated with frontend (Angular) and backend (NestJS) teams, contributing to the Angular front end when needed.
- Worked in two-week Scrum sprints (planning, estimation, stand-ups, retrospectives).
- Mentored developers and drove continuous improvement initiatives.

Redsis — Engineer and Development Analyst

July 2019 – February 2025

- Developed POS desktop applications using .NET Framework, C# and WPF.
- Built REST APIs with ASP.NET for data synchronization across distributed systems.
- Created cross-platform mobile applications using Xamarin.
- Integrated hardware devices (barcode scanners, cameras, industrial scales).
- Supported database solutions using SQL Server and PostgreSQL with Dapper, including queries and stored procedures.
- Participated in migration efforts toward Avalonia UI and modern architectures.

TECHNICAL SKILLS

Languages & Platforms:

C#, .NET 10, .NET 8, .NET Framework, .NET Standard

Backend & APIs:

ASP.NET Core, REST APIs, Razor Pages, NestJS

Frontend (supporting):

Angular

Desktop/UI:

WPF, Avalonia UI

Data Access & Databases:

EF Core, Dapper, PostgreSQL, SQL Server (incl. Stored Procedures), SQLite, Azure SQL Server

Cloud (Azure):

Azure App Services, Azure SQL Server, Azure API Management

AI Tools:

Claude Code, Codex (AI-assisted development)

Practices & Tools:

Git, CI/CD, Agile/Scrum, Unit Testing, SOLID, Design Patterns

EDUCATION

Computer Systems Engineering

Universidad del Norte
2013 – 2019 | Barranquilla, Colombia

LANGUAGES

Spanish: Native

English: Advanced
